

PAUL WARD'S ADVENTURES

A1

Workbook 3

Written by Helen Doron • Olga Smusz-Klonowska

What do (giraffes) eat?
They eat (leaves).

Types of animals based on the food they eat

Herbivores eat plants.

Carnivores eat animals.

Omnivores eat both plants and animals.

1 Write the type of **feeders** these animals are.

e.g. Jaguars are carnivores because they eat monkeys and antelopes, not plants.

a) Spiders eat insects such as flies and they do not eat plants, so they are _____

b) Snails eat only fruit and leaves, so they are _____

c) Birds eat berries and worms, so they are _____

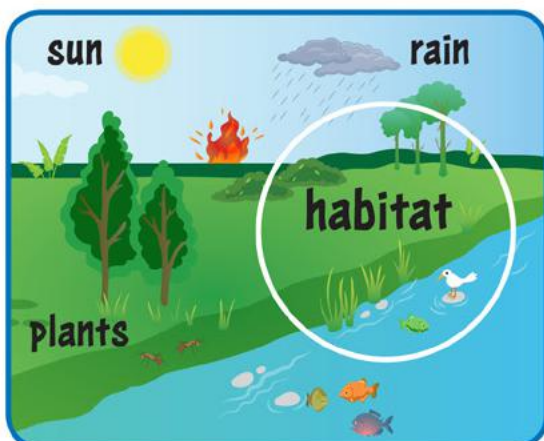

d) Ducks are _____ because they eat seeds, nuts, plants and small fish.

e) Horses are _____ because they don't eat meat.

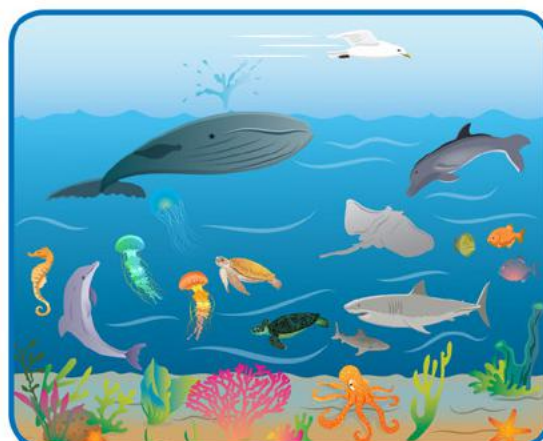

f) Owls eat insects, fish and small animals, so they are _____
